

HAVE YOUR OWN FUTURISTIC OLYMPICS

Do you want an AWARD WINNING event that promotes corporate wellness and mixes fun and competition? The Futuristic Olympics has something for everyone, with a range of sports including racing stimulators, golf with real clubs and balls, virtual hurdles and even interactive snowboarding with real snowboards to name just a few.

- To start the event we issue countries to competitors and give everyone their own hand flag
- Heats take place where everyone can have a go at everything
- Eventually we take the top countries in each event to compete in knockout stages so we can allocate points
- Once the final order has been decided we total them all up and give out medals and trophies whilst playing National Anthems for that true Olympic feel

With people taking part in events, standing round the events to cheer on their team members or even wandering between events to check how others are doing this is a great way to keep a large group of people engaged and entertained.
